Contents

Preface	vi
Acknowledgments	vii
1 The spring phytoplankton bloom	1
2 The phyecology of phytoplankton	20
3 Habitat determinants of primary production in the sea	46
4 Numerical models – the standard form of theory in pelagic ecology	69
5 The microbial loop – bacteria, bacteriovores, and viruses in the marine pelagial	92
6 The zoology of zooplankton	111
7 Production ecology of marine zooplankton	129
8 Population biology of zooplankton	162
9 Biogeography of pelagic habitats	186
10 Biome and province analysis of the oceans	215
11 Adaptive complexes of mid-water organisms	232
12 The fauna of deep-sea sediments	246
13 Benthic community ecology	270
14 Submarine hydrothermal vents	300
15 Fisheries oceanography	314
16 Ocean ecology and global climate change	341
References	367
Index	392

Color plate falls between p. 118 and p. 119
