

Trustee Council

Working Together

After the Deepwater Horizon oil spill, federal and state agencies came together to form the Deepwater Horizon Natural Resource Damage Assessment Trustee Council. The Trustees studied the effects of the oil spill on natural resources like wetlands, fish and birds. We developed a programmatic restoration plan for the Gulf of Mexico, released in February 2016 as part of a legal settlement with BP for up to \$8.8 billion.

We are now coordinating as part of trustee implementation groups for defined Restoration Areas, seen below.

The Trustee Implementation Groups will develop restoration projects and plans to accomplish the significant work needed for the Gulf. Development of these projects is guided by the programmatic restoration plan.

We have also approved standard operating procedures for the long-term management, implementation, and administration of settlement funds for natural resource restoration.
